Quick Guide: How to View the Course as a Student

The “Student View” feature enables instructors to experience a course as students will experience it.

Enabling Student View

1. Click on the “Settings” link in the Navigation menu.

2. Click the Student View button located on the top-right menu.
3. Navigate through the course as a student enrolled in the course would see it.

4. To exit Student View, click on the **Leave Student View** button located in the bottom status bar.

**Note:** The **Reset Student** button can also be used to leave Student View, but it will reset any activities—quiz attempts, discussion posts, etc.—performed by the instructor while masquerading as a student.
